Select Backfill Kits

PS205W: 1 Cubic Foot Straightening Kit

The kit will yield 1 cubic foot of expanded POLY-SET® and is primarily used to set and straighten smaller structures. A single kit contains:

- 1- 1 Gal Plastic Jug "A"
- 1- 1 Gal Plastic Jug "B"
- 1- Pair of Vinyl Gloves
- 1- Stir Stick

This kit comes with mixing instructions on both of the jugs and is packaged together in a box and palletized. The 2 Gallon plastic jug serves as the mixing container. *(Mixing impellor shown is optional)*

PS210W: 2 Cubic Feet Straightening Kit

The kit will yield 2 cubic foot of expanded POLY-SET® and is primarily used to straighten leaning distribution poles. A single kit contains:

- 1- 1 Gal Plastic Jug "A"
- 1- 2 Gal Plastic Jug "B"
- 1- Pair of Vinyl Gloves
- 1- Stir Stick

This kit comes with mixing instructions on both of the jugs and is packaged together in a box and palletized. The 2 Gallon plastic jug serves as the mixing container. *(Mixing impellor shown is optional)*

PS215W: 3 Cubic Feet Straightening Kit

The kit will yield 3 cubic foot of expanded POLY-SET® and is primarily used to straighten leaning poles and set small street light standards. A single kit contains:

- 1- 1 Gal Plastic Jug "A"
- 1- 2 Gal Plastic Jug "B"
- 1- Pair of Vinyl Gloves
- 1- Stir Stick

This kit comes with mixing instructions on both of the jugs and is packaged together in a box and palletized. The 2 Gallon plastic jug serves as the mixing container. *(Mixing impellor shown is optional)*

PS225W: 5 Cubic Feet Setting Kit

The kit will yield 5 cubic foot of expanded POLY-SET® and is primarily used to set distribution poles.

A single kit contains:

- 1- 5 Gal Pail "A"
- 1- 2 Gal Pail "B"
- 1- Pair of Vinyl Gloves
- 1- Stir Stick

This kit comes with mixing instructions on the 2 Gallon pail and the 5 Gallon pail serves as the mixing container. For larger orders the 5 Gallon and 2 Gallon pails are shipped on separate pallets. *(Mixing impellor shown is optional)*

PS230W: 6 Cubic Feet Setting Kit

The kit will yield 6 cubic foot of expanded POLY-SET® and is primarily used to set distribution poles.

A single kit contains:

- 1- 5 Gal Pail "A"
- 1- 2 Gal Pail "B"
- 1- Pair of Vinyl Gloves
- 1- Stir Stick

This kit comes with mixing instructions on the 2 Gallon pail and the 5 Gallon pail serves as the mixing container. For larger orders the 5 Gallon and 2 Gallon pails are shipped on separate pallets. *(Mixing impellor shown is optional)*

Select Backfill Kits

PS240W: 8 Cubic Feet Setting Kit

The kit will yield 8 cubic foot of expanded POLY-SET® and is primarily used to set larger distribution poles and smaller transmission poles. A single kit contains:

- 1- 6 Gal Pail "A"
- 1- 2 Gal Pail "B"
- 1- Pair of Vinyl Gloves
- 1- Stir Stick

This kit comes with mixing instructions on the 2 Gallon pail and is shipped individually on pallets. The 6 Gallon pail serves as the mixing container. (*Mixing impellor shown is optional*)
