

POLY-GROUND®

PRODUCT SPECIFICATION SHEET

Poly-Ground is specially formulated to be conductive backfill material. It keeps all Poly-Set moisture-insensitive and other physical properties, plus conductive property.

DESIGN PARAMETERS	TYPICAL VALUE	STANDARD METHOD
Compressive Strength (psi)	≥ 75	ASTM D 1621 Procedure A
Shear Strength (psi)	≥ 34	ASTM D 732
Tensile Strength (psi)	≥ 82	ASTM D 1623 Type A
Conductivity (S/m)	1.0 to 2.0	TxDOT 129 E
Resistivity (ohm-m)	0.5 to 1.0	TxDOT 129 E

Refer to Mixing Instructions Brochure and Material Safety Data Sheets for additional information on use, safety, temperature limitations, storage and handling precautions, and product liability limitations.
